

Puppy Paws Approved.

Comfort your pets can feel, safety you can trust.

Pet Pro Additive

TCR Pet Pro Ceramic Additive Beads work to disperse surface heat throughout the system, making the turf safer and more comfortable. Made from inert, non-organic particles that don't degrade, absorb contaminants, or support bacterial growth, TCR Pet Pro helps reduce odor in high-use pet environments.

Pet Pro Additive Product Data

Size	Mesh Size 8/16
Material	Bauxite
Density	3.5 kg/l (High Density)
Material Type	Inert, inorganic material
Drainage	Non-absorbant; promotes rapid drainage
Toxicity	No known toxicity: material chemically stable ceramic
Weathering / UV	UV-Stable; Does not degrade under sunlight
Antimicrobial	Inert material; does not support microbial growth
CA Prop 65	This product does not contain any substances known to the state of California to cause cancer, developmental and/or reproductive harm
Angle of Repose	~25-35 degrees; Low free-flowing ceramic granules
Combustion	Does not burn; will not support combustion
Flammability	Non-flammable
Dust	Inorganic beads; do not produce hazardous airborne particles
Availability	50lb bags / Super Sack / Bulk Shipping

- **Creates Heat Flux:** Redirects heat away from the surface and disperses it laterally.
- **Versatile Application:** Works on both new installations and existing fields.
- **Advanced Materials:** Blends high-conductivity ceramic with standard infills.
